Why choose Bushmans OzPoly?

10 Year Guarantee

Our tanks are backed by a simple, non-pro rata 10-year guarantee. This means full coverage for the full term - not a reduced payout over time.

Made Locally

All our tanks are made locally in Innisfail, North Queensland. Our tanks are purpose-built to handle the unique demands of our northern climate.

Extreme Durability

Each tank is quality tested and built with UV stabilised poly, designed to withstand the harsh Australian temperatures.

Free Delivery*

With free standard delivery to most areas within 600km of Innisfail, we make it easier and more affordable to choose a premium, Australian-made tank.

**Depending on tank sizes, some areas may require an escort, pilot or ferry fee.*
